Easy Installation

Convenient Data query

Easy Operation

Data Query And Export

*The mobile phone can connect to the device hotspot (AP)and then the data is exported directly to the mobile phone in CSV format. The table can be edited with Excel.

*The data can be queried and exported nearly 7 days by hour, 90 days, 100 weeks, 36 months, and 10 years.

Data Clearing

*Could clear the data of the day and all data, convenient and fast.

Status Indicator:
1. Red light flashes
① Re-code ② Check battery level
2. The blue light is always on
① Battery fully charged
② Wired power supply (no battery installed)
③ Long press the K1/K2 key
3. Blue light flashes
① While charging
4.The blue light is on
① Short press the K1/K2 keyStatus Indicator

Notes on coding:
1. The transmitter/receiver power on state. Note: The indicator light will flash when the transmitter (device without screen) is turned on.
2. The business hours of the equipment need to be modified to normal business hours.
3. Avoid objects that interfere with infrared rays near the device.

Battery level display:
1. Fully charge the battery before first use
2. The battery power information of the transmitter and receiver will be displayed on the device.
3. The battery level of the transmitter on the device is updated every 2 hours, and the battery level of the receiver is updated every 30 minutes.
Note: RP-receiving end , LP-transmitting end

High and low power functions:
1. The default mode of the device is low power consumption.
2. Low power consumption version is suitable for 1-10M distance
3. High power consumption version is suitable for 10-20M distance
Note: The higher the power, the farther the transmission distance is, and the device standby time will also be shortened.

RP: Receiver battery level
LP: Transmitter battery level

EASY TO INSTALL

The receiver and transmitter are horizontally aligned, with the receiver installed on the right side of the entry direction and the transmitter installed on the left side.

$145.00

① Switched on the device and enter AP configuration. Press and hold the right button of "AP Configuration" to enter the following page, and the device hotspot is successfully turned on.
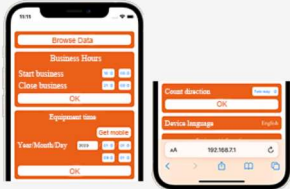

③ After the hotspot connection is successful, it will automatically jump to the configuration page. You can also open the mobile browser and input 192.168.7.1 in the URL input field to enter the passenger flow configuration interface (default The login password is 123456) successfully as shown in the figure below.

② Turn on the WLAN function of the mobile phone(it is recommended to turn off mobile data), search the WLAN network. and find the network hotspot named"FOORIR-xxxx(xxxx is the last 4 digits of the device serial number. For example The serial number is1902201010101, and the hotspot name is"FOORIR-0101"). Hotspot has no password and the connection is successful as shown in the picture.

④ Data query and data export are performed on the web side. Parameter settings: business hours, device time, statistical direction (When setting parameters, you need to confirm whether the phone is still connected to the device's hotspot).

★★★★★ **Accurate and Convenient**

Reviewed in the United States on August 3, 2024

Color: White | **Vine Customer Review of Free Product** (What's this?)

The traffic counter thing is new to me, so pardon if I sound like I don't know what I'm talking about. 'Cuz I don't. LOL

Ok, with that disclaimer out of the way, I'll get on with it. Overall, I'm impressed. I was pleasantly surprised that, without exporting data, you can store 10 years of data. Of course, that's not 10 years of daily data… it breaks down incrementally (years, months, weeks, etc) but you can also keep 90 days of detailed data as well. (hourly data for the past 7 days, cumulative data for the past 90 days, and every day, cumulative data for the past 100 weeks, every week, cumulative data for the past 36 months, every month, and cumulative data for the past 10 years, every year) I think that for most traffic studies and monitoring, you're going to find that this has all the info you need. Also, you can view this data on your phone too… so you don't have to use the dinky screen on the receiver. All in all, I think that this counter will suffice for most people's purposes.

Oh, and batteries are included. That's always a nice thing to say.

★☆☆☆☆ **SCAM! I WhatsApp the company for help. Asking for more money**

Reviewed in the United States on July 8, 2024

Color: White | **Verified Purchase**

UPDATE - I talked with the company on WhatsApp and it worked briefly. Now I can't connect again. He asked me to send him a video. He said he watched my video and offered to send me a new set for another $135. I NEVER SENT THE VIDEO. THIS IS A SCAM!
It worked for one day as far as reading the number of people but I haven't been able to get it to connect to my phone and now it isn't counting at all.

★★★★☆ **A neat set, seems accurate**
Reviewed in the United States on July 10, 2024
Color: White | **Vine Customer Review of Free Product** (What's this?)

This came neatly wrapped and the devices are quite lightweight, so are easy to hang up and secure. Batteries are included, and based on the capacity, I expect it will last a good length of time on one charge. You can see how much charge is left on the display. There is a learning curve to setting this up, I highly recommend watching the video if you're new to setting such things up. It's not overly complex, but not too intuitive, especially when it comes to turning on the device hotspot and connecting with your phone. I do like you can easily export data on this device, it makes analysis easy if you're trying to expand your business or gauge your audience. This does seem to work quite accurately, and only counts during the hours you designate. It's not the easiest screen to read and use, and seems quite pricey, but if you need accurate traffic counting, this does the job and is a small, non-noticeable addition to your hallway.

★★★☆☆ **Okay not great**
Reviewed in the United States on September 20, 2024
Color: White | **Vine Customer Review of Free Product** (What's this?)

This device counts how many people come in and out of a place, which is super helpful if you're trying to keep track of how busy a store or event is. One of the best features is that it can connect to your mobile phone's hotspot. This means you can easily check the data from anywhere as long as you have your phone with you. It's really neat to see how many people visited in real-time, and you can even export the data if you need to share it with someone else. The display is clear and easy to read, so I didn't have any trouble understanding the numbers. I like that it shows incoming and outgoing data separately, which helps you see the flow of people. It's user-friendly and gives you important information that can help make better decisions.

★★★★★ **It's for my ghost kit.**
Reviewed in the United States on June 11, 2024
Color: White | **Vine Customer Review of Free Product** (What's this?)

Okay I didn't actually need a people counter but I wanted to see if it would be viable in a ghost hunting kit. It works for seeing me and my husband, but no ghosts yet. :D

★☆☆☆☆ **Odd wifi to gather data.**
Reviewed in the United States on August 31, 2024
Color: Black | **Verified Purchase**

You have to connect to this unit's wifi- odd- Not an app- Cannot easily be shared for gathered data but does count well- that's about it

★★★★☆ **Efficient and User-Friendly People Counter!**
Reviewed in the United States on June 22, 2024
Color: White | **Vine Customer Review of Free Product** (What's this?)

I recently installed the JFOORIR Traffic Counter, and it has been a fantastic addition to our business. This infrared people counter accurately displays incoming and outgoing data separately, making it easy to track foot traffic. The best part is the convenience of connecting to the device via mobile phone to view and export data through its hotspot.The setup was straightforward, and the device works flawlessly. It's incredibly helpful for managing and analyzing visitor data. Overall, this counter is efficient, user-friendly, and a great tool for any business. Highly recommend!

★★★★★ **Easy to set up and use, cloud-free app-free interface ♥**
Reviewed in the United States on May 10, 2024
Color: White | **Vine Customer Review of Free Product** (What's this?)

I really like this, easy to read display, great interface, database dumps, excellent sensitivity and in/out accuracy. The units are tiny and light and easy to mount. They do use 16500 batteries but they include 2 and a charger in the box. Each unit has a USB C connector too. Awesome people counter if mounting to the left/right sides of the entry is ok for your use case. I'd love to try their overhead camera style too, that looks neat, but I'm using it for a pop-up sales environment where the passthrough beam is more ideal.

Pairing is a snap. The capacitive buttons and menu are responsive and super easy to operate. AP mode is only on the bare minimum time needed to set it up. The manual is easy to understand and there are videos available online.
